ABOUT ME

Software Engineer with a specialization in Cybersecurity, trained in secure software development, building secure environments and optimizing systems and workflows. I am passionate about integrating cutting-edge technology to solve complex problems, actively leveraging Artificial Intelligence (specifically Machine Learning models and LLMs) to automate processes. With a solid foundation in full-stack development and cloud infrastructure, I am driven to build secure, intelligent and scalable solutions.

PERSONAL PROJECTS

- **CVE Intelligence Analyzer (Bachelor's Thesis - AI Security Tool) | 2026:**
Developed a comprehensive vulnerability analysis system implementing Machine Learning (Random Forest) and NLP to predict CVE exploitation probability with 82% accuracy. Engineered an automated data ingestion pipeline from multiple sources (NVD, Exploit-DB, GitHub) and implemented a custom scoring model that outperforms standard CVSS. Built with Python, Scikit-learn and SQLAlchemy. Final grade: 9.65/10 (~ 3.9/4.0 GPA).
- **Commercial Intelligence Platform (Holds API) | 2026:**
Built a full-stack application for an event-ticketing company (under NDA) that automates invoice management and turns billing data into sales intelligence: client rankings, follow-up queues and alerts for the sales team. Python, FastAPI, React, TypeScript, Docker.
- **Cloud-Native Modular App (AWS) | 2025:**
Developed a microservices-based application deployed on AWS using Docker, REST APIs, EC2, and RDS.
- **Battle Royale Game (Java) | 2024:**
Programmed a complete video game applying advanced object-oriented programming and state management.

WORK EXPERIENCE

PwC - Cyber Security Consultant (Part-time) Oct 2025 - Nov 2025

- Assisted in vulnerability assessments, security audits, and risk management for corporate clients. Supported the cybersecurity team in analyzing potential threats, ensuring compliance, and drafting technical reports to mitigate risks and protect sensitive data.

Event-Tech Startup (NDA) - Junior AI Developer May 2025 - Sep 2025

- Developed and integrated Machine Learning models and Large Language Models (LLMs) to automate processes and optimize company workflows. Assisted the engineering team in data processing, model training, and the deployment of AI-driven software solutions.

Wifi-revel - Event Network Specialist May 2024 - Sep 2024

- Managed network infrastructure and connectivity for various events. Handled the deployment, configuration, and troubleshooting of networking equipment (routers, switches, access points) to ensure highly available, secure, and seamless internet access for high volumes of users.

ACADEMIC EDUCATION

U-TAD (University Center of Technology and Digital Art) | Madrid 2022 - 2026

Bachelor's degree in Software Engineering, specializing in Cybersecurity.

Bachelor's Thesis: CVE Intelligence Analyzer - 9.65/10 (~ 3.9/4.0 GPA).

IES Do Castro | Vigo 2020 - 2022

International Baccalaureate (IB) Diploma.

LANGUAGES

- Spanish: Native
- English: Full Professional Proficiency (C1)
- German: Intermediate (B1)

SKILLS

- Cybersecurity & Forensics
- Python, Java, C/C++, Bash
- Machine Learning & LLMs
- AWS Cloud & Docker
- SQL & NoSQL (MariaDB, MongoDB)
- Effective Communication
- Full-Stack Web Development
- Proactive Team Player
